Independent Auditors' Review Report

To: Acme Electronics Corporation

Preface

We have reviewed the Consolidated Balance Sheet of Acme Electronics Corporation and its subsidiaries (hereinafter the “Group”) as of June 30, 2023 and 2022, the Consolidated Statements of Comprehensive Income for the three months ended June 30, 2023 and 2022, and for the six months ended June 30, 2023 and 2022, Consolidated Statement of Changes in Equity, Consolidated Statement of Cash Flows and Notes to the Consolidated Financial Statements (including the summary of significant accounting policies) for the six months from January 1 to June 30, 2023 and 2022. It is the responsibility of management to prepare consolidated financial statements in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Accounting Standard 34, "Interim Financial Reporting", as endorsed by the Financial Supervisory Commission and issued in effect. Our responsibility is to express a conclusion on the consolidated financial statements based on our review.

Scope

We have conducted our review in accordance with Statement of Auditing Standards No. 2410, "Review of Financial Statements" except for those specified in the basis of our qualified conclusion. The procedures performed in reviewing the consolidated financial statements include making inquiries (primarily of persons responsible for financial and accounting matters), analytical procedures and other review procedures. A review is significantly less in scope than an audit and, accordingly, we may not be able to discern all significant matters that could be identified by an audit and, accordingly, we cannot express an audit opinion.

Basis for qualified conclusion

As stated in Note 12 to the consolidated financial statements, the balances of investments accounted for under the equity method amounted to NT\$19,294 thousand and NT\$26,326 thousand as of June 30, 2023 and 2022, respectively, the net losses of affiliates accounted for

under the equity method amounted to NT\$1,529 thousand and NT\$1,252 thousand from April 1 to June 30, 2023 and 2022, respectively, the net losses of affiliates accounted for under the equity method amounted to NT\$3,444 thousand and NT\$5,880 thousand from January 1 to June 30, 2023 and 2022, respectively, based on the unreviewed financial statements of these investees for the same periods.

Qualified conclusion

According to the results of our review, except the influence of the financial statements of the investees that have been reviewed by the auditor in the section of the Basis for Conclusions, we have not found any material aspects of the above consolidated financial statements that have not been prepared according to the Regulations Governing the Preparation of Financial Reports by Securities Issuers and the International Accounting Standard 34, "Interim Financial Reporting" as endorsed by the Financial Supervisory Commission and issued in effect, which may lead to the inability to fairly express the consolidated financial positions of the Group as of June 30, 2023 and 2022, and the consolidated financial performance of the Group from April 1 to June 30, 2023 and 2022, and the consolidated financial performance and consolidated cash flows of the Group from January 1 to June 30, 2023 and 2022.

IV. Summary of Significant Accounting Policies

(I) Statement of compliance

The consolidated financial statements have been prepared in accordance with the Regulations Governing the Preparation of Financial Reports by Securities Issuers and IAS 34 Interim Financial Reporting as endorsed and issued into effect by the

FSC. The consolidated financial statements do not include all IFRSs disclosures required for the annual financial report.

(II) Basis of preparation

The consolidated financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value and net defined benefit liabilities which are measured at the present value of the defined benefit obligation less the fair value of plan assets.

The fair value measurements are grouped into Levels 1 to 3 based on the degree to which the fair value measurement inputs are observable and the significance of the inputs to the fair value measurement in its entirety:

1. Level 1 inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities on measurement day.
2. Level 2 inputs are inputs other than quoted prices included within Level 1 that are observable for an asset or liability, either directly (i.e., prices) or indirectly (i.e., derived from prices).
3. Level 3 inputs are unobservable inputs for an asset or liability.

(III) Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and the entities controlled by the Company (i.e., its subsidiaries). The financial statements of the subsidiaries have been adjusted to bring their accounting policies in line with those used by the Group. All intergroup transactions, balances, income and expenses are eliminated in full upon consolidation. The total comprehensive income of subsidiaries is attributed to the owners of the Company and the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Please refer to Note 11 and Table 3, and Table 4 for detailed information on subsidiaries (including the percentages of ownership and main businesses).

(IV) Other Significant Accounting Policies

Except for the following, please refer to the summary of significant accounting policies in the consolidated financial statements for the year ended December 31, 2022.

1. Defined benefit post-employment benefits

Pension cost for the interim period is calculated using the actuarially determined pension cost rate as of the prior year-end, based on the beginning

of the year to the end of the current period, adjusted for significant market fluctuations and major plan amendments, liquidations or other significant one-time events during the period.

2. Income tax expense

Income tax expense represents the sum of the tax currently payable and deferred tax. Income taxes for the interim periods are assessed on an annual basis, and the pre-tax benefit for the period is calculated using the tax rate applicable to the expected total annual earnings.

V. Critical Accounting Judgments and Key Sources of Estimation Uncertainty

For the critical accounting judgments and key sources of estimation uncertainty used in the development of the Group's critical accounting estimates, please refer to the Consolidated Financial Statements for 2022.

However, those contracts did not meet the criteria of hedge effectiveness, and therefore, the Group did not apply hedge accounting treatments for derivative contracts.

Accounts receivable, net	<u>\$ 602,792</u>	<u>\$ 747,391</u>	<u>\$ 859,813</u>

The credit period for the sale of goods by the Group was approximately 30 to 150 days, and interest was not charged due to the short credit period.

In order to control credit risk, the Group assesses the credit quality of individual customers and determines the credit limit through the internal credit rating system, and regularly reviews based on individual customers' historical transaction records and financial status every year. In addition, the Group reviews the recoverable amount of accounts receivable one by one on each balance sheet date to ensure that the accounts receivable that may incur credit risk have been provided with appropriate impairment losses.

The Group measures the loss allowance for accounts receivable at an amount equal to lifetime ECLs. The duration of expected credit losses is estimated after using an allowance matrix by reference to past default experience with the customers and their current financial positions, economic conditions of the industry, and outlook. Due to the fact that the historical experience of the Group in evaluating credit losses shows no significant differences in the loss patterns of different customer groups, the provision matrix does not further differentiate between customer groups, and only calculates the expected credit loss rate based on the number of overdue days of accounts receivable.

The Group writes off accounts receivable when there is information indicating that the debtor is experiencing severe financial difficulty and there is no realistic prospect of recovery of the receivables. For accounts receivable that have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivables due. Where recoveries are made, they are recognized in profit or loss.

The following table details the loss allowance of notes and accounts receivable based on the Group's allowance matrix.

XXII. Capital Risk Management

The Group manages capital management under the precondition for sustainable development to ensure that it is able to maximize the benefit for its shareholders by optimizing debt and equity.

Key management personnel of the Group review the capital structure of the Group irregularly. As part of this review, the key management personnel consider the cost of capital and the risks associated with each class of capital. Based on the recommendations of the key management personnel, the Group may balance its overall capital structure by paying dividends, issuing new shares, buying back shares and raising new debt or redeeming old debt.

XXIII. Financial instruments

(I) Fair value information - financial instruments not measured at fair value

Except the derivative instruments are measured at the fair value after the original recognition, the financial assets and financial liabilities of the Group are measured at the amortized cost and the management of the Group believes that the carrying amounts are close to their fair value.

(IV) Financial Risk Management Objectives and Policies

The Group's principal financial instruments include cash and equivalent cash, receivables, other receivables and long-term, short-term loans, short-term notes payable, payables, other payables and lease liabilities, etc. The financial management department of the Group coordinates the financial operation in the domestic financial market, and supervises and manages financial risks related to the operation of the Group by analyzing the internal risk reports of the risks according to the level and scope of risks. Such risk includes market risk (including foreign exchange risk and interest rate risk), credit risk, and liquidity risk.

The Group avoids exposure through derivative financial instruments to mitigate the impact of such risks. The use of derivative financial instruments is regulated by policies passed by the board of directors of the Group. Internal auditors focus on reviewing the observance of the policies and the quota of risk exposures. The Group has not engaged in transactions in financial instruments (including derivative financial instruments) for speculative purposes.

1. Market Risks

The Group's activities expose it primarily to the market risks of changes in foreign exchange rates (see (1) below) and the changes in interest rates (see (2) below).

(1) Foreign exchange risk

The Group conducted foreign currency sales and purchases, which exposed the Group to foreign currency risk. The management of the Group's exchange rate exposure is to use foreign exchange forward contracts to manage risks of net foreign currency within the scope permitted by the policy.

Please refer to Note 27 for the carrying amount of monetary assets and monetary liabilities of the Group denominated in non-functional currencies on the balance sheet date (including monetary items

denominated in a non-functional currency which have been eliminated in the consolidated financial reports).

Sensitivity analysis

The sensitivity analysis of foreign exchange rate risks is mainly computed with respect to foreign currency items on the end date of the financial reporting period. The Group is mainly impacted by the exchange rate fluctuations in USD. If the Group's functional currency appreciated/depreciates 3% against the U.S. dollar, the Group's pre-tax loss for the period from January 1 to June 30, 2023 will increase/decrease by NT\$7,666 thousand, and the pre-tax benefit for the period from January 1 to June 30, 2022 will decrease/increase by NT\$406 thousand.

The carrying amounts of the Group's financial assets and financial liabilities with exposure to exchange rates on the balance sheet date were receivables payables and loans denominated in USD.

In the management's opinion, the sensitivity analysis was unrepresentative for the foreign currency risk of interim period because the exposure at the end of the reporting period did not reflect the exposure during the period.

(2) Interest rate risk

The Group was exposed to the fair value risk of interest rate fluctuations for the fixed interest rate bearing financial assets and financial liabilities; the Group was exposed to the cash flow risk of interest rate fluctuations for the floating interest rate bearing financial assets and financial liabilities. The Group's management regularly monitors the fluctuations in market rates and then adjusted its balance of floating rate bearing financial liabilities to make the Group's interest rates more closely approach market rates in response to the interest rate risk.

The carrying amount of the Group's financial assets and financial liabilities with exposure to interest rates at the end of the reporting period were as follows:

	June 30, 2023	December 31, 2022	June 30, 2022
Fair value interest rate risk			
- Financial assets	\$ 529,486	\$ 420,088	\$ 410,009
- Financial liabilities	269,951	256,540	564,012
Cash flow interest rate risk			
- Financial assets	133,448	68,301	135,760
- Financial liabilities	1,582,642	1,997,926	1,600,241

Sensitivity analysis

The fixed-rate financial assets / liabilities held by the Group are not included in the analysis as they are all measured at amortized cost. For floating rate assets / liabilities, the analysis was prepared to assume that the amount of the assets / liabilities outstanding at the end of the reporting period was outstanding for the whole year. The rate of change used internally in reporting interest rates to the key management personnel from the Group is a 0.5% increase or decrease in interest rates, which also represents the management's evaluation of the reasonable range of possible changes in interest rates.

With all other variables held constant, a 0.5% increase/decrease in market interest rates would increase/decrease the Group's loss before tax by NT\$3,623 thousand from January 1 to June 30, 2023, and decrease/increase the Group's profit before tax by NT\$3,661 thousand from January 1 to June 30, 2022.

2. Credit risk

Credit risk refers to risk that causes the financial loss of the Group due to a counterparty's delay in performing contractual obligations. As of the balance sheet date, the Group's largest credit risk exposure from a counterparty's failure to fulfill obligations came from the carrying amount of financial assets recognized in the consolidated balance sheets.

The policies adopted by the Group are to only conduct transactions with reputed counterparties, and to obtain sufficient collateral under necessary circumstances to reduce the risk of financial losses. The Group uses publicly available financial information and mutual transaction records to rate major customers. The Group continuously monitors credit exposure risks and the credit ratings of counterparties, distributes the total transaction amount to customers with qualified credit ratings, and controls credit exposure risks through non-periodic review and approval of counterparty credit limits.

In order to minimize credit risk, the management of the Group has delegated a team responsible for determining credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group reviews the recoverable amount of each individual receivable on the balance sheet date to ensure that adequate allowances are made for possible irrecoverable amounts. Accordingly, the management of the Group believes that the Group's credit risk is significantly reduced.

In addition, the credit risk of working capital and derivative financial instruments is limited because the counterparty is a bank with a high credit rating given by an international credit rating agency.

The Group's credit risk by geographic region was mainly concentrated in mainland China and accounted for approximately 69%, 70% and 75% of total accounts receivable as of June 30, 2023 and December 31 and June 30, 2022, respectively.

3. Liquidity risk

The Group operations and mitigate the effects of the operating cash flow fluctuations by managing and maintaining sufficient cash and cash equivalents.

(1) Liquidity and interest rate risk tables

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities with agreed repayment periods based on the probable earliest dates on which the Group can be required to pay. The table has been drawn up based on the undiscounted cash flows of financial liabilities, including the estimated cash flows of interests and principals.
